

The Neo M-Care Phone

Providing peace of mind inside and outside the property

The Possum Neo M-Care Phone

The portable and lightweight Neo M-Care Phone is a fantastic way to manage a system of alarms and enhanced Telecare sensors both inside and for the first time, outside of the home.

Two button and five button version available

Imagine the possibilities:

- Fall Detection away from the property (fall detector required)
- Pendant press outside the house with voice communication and mapping (Unit comes with or without GPS – you decide)
- Connection to 8 alarms and sensors inside or outside the property
- Alarms can be escalated to 8 different numbers including other mobile phones and a Central Telecare alarm centre
- Integrates with any Possum enhanced Telecare device (pendant/fall sensor/smoke etc).
- Uses GSM therefore analogue landline not required
- The Neo M-Care really is suitable for many different applications and enables you to care for your clients outside their property where they are most vulnerable
- Flexible and simple programming

Who can benefit:

This innovative product via its flexibility for greater support can bring immediate benefits to numerous groups including but not limited to:

- People at risk of a fall
- People with learning difficulties
- People with Physical difficulties
- Dementia Sufferers
- People who don't want that 'badge of vulnerability'
- Victims of domestic abuse
- People with epilepsy
- People with mental health problems
- People recently discharged from hospital
- People without a fixed landline
- Lone workers
